

**External venetian blinds from Griesser.
Grinotex III Sinus®**

Grinotex III Sinus®

The unique slat design of the Grinotex III Sinus® version convinces with its design. The robust and particularly kink-proof slat profile is at the same time exceptionally elegant and ideal in order to set an architectural highlight. In addition to the proven properties of the Grinotex® III version, Grinotex III Sinus® optimizes both use of daylight and glare protection.

Grinotex III Sinus® is available as a MINERGIE® module in an automated version.

Product- Highlights

Discover Soft-Closing

1 Use of daylight

As well as being esthetically pleasing, the sinusoidal slat allows up to 50% more daylight into the room. Thanks to the wave-shaped design of the slat, there are no sharp edges to break up the light; instead, the light is guided better to the ceiling without causing glare at low levels.

2 Soft-Closing

With its soft movement, the Comfort Drive permits an exact positioning of the slats as well as exact light regulation. A slow approach to the final position enables the slats to close virtually without noise.

3 Safety sensing edge

The integrated safety sensing edge causes the blind to stop at once whenever the slats come into contact with an object.

4 Safety locking device

The burglary-resistant safety locking device functions in every position with the Grinotex III Sinus®.

5 Operating position (option)

When a blind is lowered, there is often a disruptive effect, especially on a work space. The operating position of approximately 48 degrees prevents these dark phases when the blind is lowered.

6 Integrated lifting mechanism

The Grinotex III Sinus® is an external venetian blind with metal joints in full-metal quality. The slats are designed for placement on both sides in guide rails with integrated lifting mechanism. Stainless steel wire rope with UV-stable plastic casing connects the individual slats.

Our color scheme

OUR COLORS

STANDARD COLORS

Surface structure

Semi-gloss

 RAL 9010	 RAL 9016	 RAL 9006	 VSR 140
 RAL 9007/VSR 907	 RAL 7022	 RAL 7016	 RAL 8019

PREMIUM COLORS

GriRal Colors

Our GriRal color collection has an assortment of 50 different RAL shades of color. From sand yellow to standard white, we offer a complete selection of hues for every color family. We're convinced that with our color palette, you will find exactly the right shade of color for your needs.

GriColors

The GriColors range includes 100 color shades in four collections, Glass & Stone, Sun & Fire, Water & Moss and Earth & Wood – from cool white and sunny red to natural blue and earthy brown.

Surface structure

Semi-gloss

BiColor

External venetian blinds get a new color accent: When bright color is dominant outside, a neutral light can optimize the shading function inside. Create your own preferred color combination using our two color collections, GriColors and GriRal (excluding standard colors).

The exterior color shows as a border along the edge of the interior view. Our color recommendations for interior colors: white (VSR 901), light gray (VSR 904) or medium gray (VSR 130).

SPECIAL COLORS

Color means individuality - there are practically no limits to our Special Colors. No wish goes unanswered with additional innumerable and facade-ready color tones.

Our comfort

CONTROLS

Grinotex III Sinus® can be operated through a variety of control systems, from a simple hand-held transmitter to a master control or a building management system, depending on the time, position of the sun and the weather.

Thermal comfort

The ambient conditions change over the course of the day and during the seasons. With a blinds control device from Griesser, you can adjust your solar shading to match your personal requirements in accordance with changing exterior circumstances. And making these adjustments is so simple that you will still have time to take care of the important things in your life.

An optimal daylight concept makes artificial air conditioning superfluous in the summer. You save energy costs and may well also avoid one or another unwanted summer cold. In the winter, on the other hand, a solar shading system can protect you against cold and allow the scarce rays of the sun into the room, thus saving once again on energy costs, not to mention facial tissues.

Visual comfort

Having a sense of well-being also means being able to decide for oneself, particularly within one's own four walls, just how much one wants to reveal to the outside world. With Grinotex III Sinus®, you are sheltered from uninvited glances from the outside world.

BiLine hand-held transmitter

Centero server for iPad and iPhone operation

BILINE - REMOTE CONTROL

The control system Griesser BiLine provides contemporary design and high functional security through routing technology. Wireless systems have the advantage of being installed quickly, not only in new buildings but also when refitting an automated system in existing buildings.

KNX / GBUS HOME AND BUILDING AUTOMATION

The Griesser KNX and gBUS solar shading controls are integrated master controls with extensive functionalities for any building of any size. With proven functions such as solar tracking and horizon limitation, it meets the highest expectations for solar shading control.

FRONT MOUNTED SYSTEM

Vertical section: Example with cover

The self-supporting

The self-supporting blind design protects the insulation in the header and reduces service costs. The system needs no fastening for the housing for widths of up to 2000 mm – the insulation remains intact and noise transmission is reduced.

LIMIT DIMENSIONS

Single blind

Operation	Width min. (bk)	Width max. (bk)	Height min. (hl)	Height max. (hl)	Surface max. [m ²]
Crank drive	600 800 ¹	4000	380	4250	8
Motor drive	760 825 ²				

Connected systems

Operation	Width max. (bk)	Height max. (hl)	Blinds max.	Blinds per system	Surface max. [m ²]
Crank drive	10 000	2300	3	2 3	8 6.5
Motor drive	5500	4250	2	2	8

¹ If crank drive is in slat area: maximum surface area and crank position available on request.

² Motor drive with operating position.

Parallel switching (only with Elero Comfort Drive)

Several drives can be switched in parallel with limitation to expand the surfaces.
