Awnings   Patio roofs   Glasoasen®

A woman with long, wavy brown hair is sitting on a modern, light-colored outdoor sofa. She is wearing a grey shawl and blue jeans, and is holding a glass of beer. She is looking out of a large window at a garden with tall grasses and a white boat. The scene is set during sunset or sunrise, with a warm, golden light. The text "For cosy corners ..." is overlaid on the image in a white, sans-serif font.

For cosy corners ...

# ...and a fresh summer breeze

Whether you want it protected and cosy or fresh and airy, with the frameless w17 easy full glass sliding door you experience pure living enjoyment – on your patio.

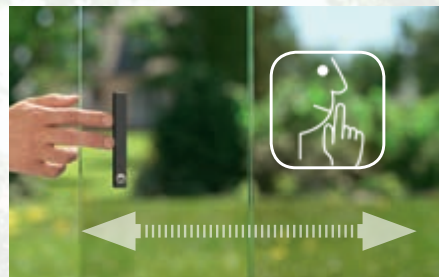

- ✓ Reliable weather proofing
- ✓ Full transparency
- ✓ Comfortable opening and closing

There's no easier way to extend the precious hours on your patio!

## Soft-Closing-System

The w17 easy full glass sliding door comes as standard with the new Soft-Closing-System. It allows for the extremely quiet and easy movement of the glass leaves. Two other options are also available.

## Soft closure aid

A soft closure aid option can also be added to the Soft-Closing-System. With this the leaf is **supported when closing** similar to a modern kitchen drawer. This enhances the closing process.

## Easy-close and park option

The park option ensures that glass elements run smoothly and quietly. It also **slows down the opening process** and securely fixes the glass leaf in the end position.

Easy-peasy...

# ... backwards and forwards

Even large all-glass elements can be moved really easily – **without much force and energy.** weinor makes it possible. Making opening and closing easy-peasy.

# Perfect down to the tiniest detail

## Easy cleaning using CleanCase®

The floor rail serves as a guide for the glass elements. Leaves and dirt can collect from the outside here and be difficult to remove, especially in the corners and grooves. With the integrated CleanCase® it's no problem. Using a brush, the dirt can simply be swept into the CleanCase® and outside. Even rainwater runs off over the CleanCase®.

## Flatter floor rails – elegant and reduced stumbling hazards

Besides the higher standard floor rails with weinor CleanCase® you can also choose the **flat version**. This version does not have a CleanCase®. The benefit for you: it is so low that it almost presents no obstacle in transitions – **simply accessible!**

Elegant floor connection profiles that go well with any flooring ensure a nice transition between the floor rail and the patio floor.

Version:  
flat floor rail with  
interior connection profile

## Accessible room divider for indoors

w17easy is not just for use on patios. The full glass sliding door is also suitable for indoors – as an elegant room divider, **without any anti-stumbling thresholds**. Turning a small room into a large one with just one simple action. Anyone who prefers an opaque but translucent glass with velvet matt surface chooses the **satin-finished version**.

# More security – elegant design

## Convenient retention

weinor has developed **simple and robust inter-locking** so that the completely closed glass leafs remain reliably in the required position. Slight pressure with your foot is all it takes to securely lock the w17 easy and open it again.

**Maximum flexibility:** As an option, the last normally fixed leaf can be pushed, unlocked and moved in front of the other glass elements.

## Lockable patio

With the **lockcase and hung bolt**, the w17 easy can be locked easily from the inside. This is sensible, for example, if small children or pets are not to leave the patio. A version that can be locked from both sides is also available on request. Another benefit: the profile cylinder is extremely corrosion-resistant.

Standard powder coated handle bar possible that can be operated from both sides with high handle or that can be operated from inside with flat handle outside.

Stainless steel  
handle bar

Round stainless steel  
cup pull handle

Lockcase and hung  
bolt view from inside

## Clear shapes

Create visual accents!  
The design of the handles,  
profiles and lock is based on  
the trend of modern, **clear**  
**lines** and the **screwless look**.

## Large variety of colours

Be it handles, lock or profiles: the  
entire system can be coated in the  
colour you want and therefore be  
**adapted perfectly to the existing  
architecture.**

At weinor you can select from more  
than 50 standard colours and more  
than 150 RAL colours.

Powder coated  
handle bar

**9 WiGa trend colours**  
**47 standard RAL colours**

The powder coating done in our  
in-house factory guarantees  
**colour fastness and a uniform  
gloss level.**

# w17 easy – simply always fits

w17 easy is suitable as a substructure for practically all types of roofs. Thanks to the "standing design", retrofitting does not entail any extra costs for static adjustments of the patio roof or the Pergola awning.

## Patio roofs / verandas

Your patio roof turns into your garden room with the w17 easy! All-round protection with unobstructed views of the sky and nature. Whether the construction is made out of **glass, wood or metal**: the full glass sliding door from weinor is the perfect solution.

## Pergola awnings

Pergola awnings are weather-proof sun protection systems with **high wind stability and that cabriolet feeling**. With the w17 easy added, you also have a room protected from the weather on the sides and from the front on your patio.

## Balconies and loggias

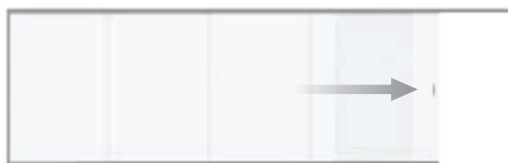

A great deal of time can be spent on balconies and loggias if they are enclosed all-round with the w17 easy full glass sliding door. It is possible to use it if there is a **load bearing substrate**.

## Custom systems

The weinor full glass sliding door is not available off the shelf. Rather, it is **adapted on an individual basis by your retailer and partner** – with many options, in numerous sizes. It can also be retrofitted **afterwards** without any problem.

### How the w17 easy works

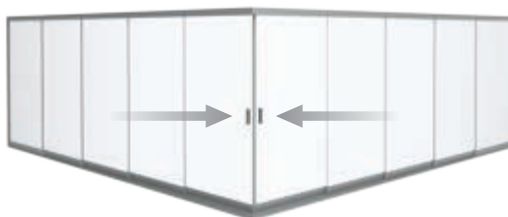

#### Single system

Opens on one or two sides, closes on the left and/or right.

#### Lockplate version

Opens on two sides, closes in the middle.

#### Corner unit

Frameless full glass corner, e.g. for balconies or loggias.

Soft-Closing-System	Standard	Standard
Easy close	Option	–
Park option	Option	Option
Corner unit	90°	90°

\* increased requirements with restrictions possible as of a 2.4 m system height

## Even more weinor glass solutions

### Curtain systems for non-load bearing substrates

Specific construction conditions for example a non-load bearing floor sometimes make it necessary to use so-called "curtain" glass systems. This may be the case, for example, with balconies or loggias.

**The weinor w26-c utility slide-and-turn partition** is ideal for this.

The glass panes are simply **pushed to the side or round the corner** and turned into the parking position to save space.

### Doors, windows, skylights

Depending on individual requirements and the structural conditions, special glass constructions are considered. weinor offers a variety of solutions for this with the **framed windows, doors, skylights** and **frameless fixed glazing in the w50-c series**.
